digital brochure

As the Association of Czech Industrial Design, we unite Czech manufacturing companies that share a long tradition of collaboration with designers in product development. This exhibition showcases 15 of our member and allied brands, with the UK being one of their major overseas markets. They represent the constantly growing Czech industry and all of them are among European and world leaders in their field. Together they help to create what is considered a national brand.

The featured brands tell different stories - behind some of them are centuries of history, rooted in traditional Czech crafts such as glassmaking and joinery. Others have evolved from family businesses or are young, dynamic brands with a progressive view of design as an integral part of sustainable production. They all share the same values - honest work, an innovative approach, and unique distinctive design.
